- Units under the Security Printing and Minting Corporation of India (Ministry of Finance & Revenue).

DEFENSE SECTOR ENGAGEMENT

At Moneda Tech Global Pte. Ltd., we closely work with governments in the defense sector, offering our expertise to meet their specialized needs. By combining our knowledge with government requirements, we contribute to strengthening security measures and maintaining the highest standards.

In 2024, we marked a significant milestone by entering the Border Security Solutions sector.

We are proud to be a licensed exporter and channel partner for Defence Public Sector Undertakings (DPSUs) under the Ministry of Defence.

This partnership allows us to deliver superior defense equipment, including rescue solutions and fortified vehicles designed to enhance the comfort and safety of soldiers and security personnel.

OUR SERVICES

By leveraging our expertise and partnerships, Moneda Technologies strives to deliver high-quality solutions to effectively meet the border security and defence needs of our clients. We offer a wide range of services aimed at facilitating the export and distribution of products through key partnerships, ensuring national and border security with innovative solutions and state-of-the-art equipment and supplies.

Advanced Weapons and Equipment:

- Small Arms
- Systems & Platforms
- Overhauls & Upgrades
- Ordnances & Artillery

Ammunition & Explosives:

- Small Caliber Ammunition
- Medium Caliber Ammunition
- Large Caliber Ammunition
- Explosives & Propellants
- Rockets & Missiles

Armoured Vehicles:

- Armoured Fighting Vehicles
- Main Battle Tanks
- Bridge Layer Tanks
- Engines & All types of spare parts and sub-assemblies
- Specialized Vehicles

Troop Comfort and Tactical Gear:

- Life-Cycle Clothing
- Extreme Cold Climate Clothing
- Troop Mountaineering Equipment
- Supply Drop & Other Equipment

Parachutes & Rescue Solutions:

- Military Parachutes
- Rescue Boats
- Emergency Services Parachutes
- Aircraft Parachutes for Russian Aircrafts as well as for European aircrafts

Advanced Weapons and Equipment:

We specialize in a wide range of small arms (Assault Rifles, Close Quarter Battle Carbines, Sniper Rifles), sophisticated weapon systems, and platforms to meet the needs of armed forces, law enforcement agencies, and civilian markets.

We also excel in overhauls and upgrades, ensuring the longevity and enhanced performance of existing equipment.

With a strong focus on innovation and quality, we are dedicated to supporting national security and contributing to defence self-reliance.

WE OPERATE WITH **THE BEST**

We work with globally recognized brands such as AREX, STEYR, BYRNA, PlaySport and Fortis, each known for their excellence in defense, security, and tactical solutions. Our association with these companies reflects our capability to collaborate with international manufacturers and deliver high-quality, reliable products that meet stringent global standards, reinforcing our commitment to innovation, performance, and trust in the security and defense domain.

The AREX logo consists of the word "AREX" in a bold, sans-serif font. The letter "A" is stylized with a triangular cutout on its left side.The PLAY SPORT logo features the words "PLAY SPORT" in a bold, sans-serif font. A small starburst graphic is positioned to the left of the word "PLAY".

FIREARMS

AREX DELTA GEN.2

The AREX DELTA GEN.2 is extra thin, compact and light enough to be carried concealed while providing the capability for serious personal protection. The AREX DELTA GEN.2 is the perfect striker-fired pistol for duty carry because of its enhanced safety features, reliability and durability. With a low bore axis and clever weight distribution it enables you to shoot fast follow-up shots with precision difficult to find in other compact pistols

AMMUNITION

• MT-X

MARKER TRAINING AMMUNITION

MT-X is the safest alternative in the field of marker-training systems, designed for safe and realistic force-on-force and force-on-target shooting. The non-toxic marking compound used in our cartridges provides excellent visibility and is easily washable. Different bullet colors identify the training units. Featuring health and environmentally friendly primers as standard, our system boasts compatibility with widely used platforms like Simunition FX ammunition and conversion kits. With reliable operation, good accuracy, and clearly visible hit markings, our solution prioritizes safety with short distances. The complete system, including weapons, conversion kits, marker training ammunition, protective equipment, and training, is not only effective but also reasonably priced. Embrace a training experience that goes beyond expectations.

• BLAN-X

POLYMER BLANK AMMUNITION

No maneuver is complete without simulating real-life conditions in the field. This also includes the acoustic simulation of real combat situations with full functionality of the weapons used. AREX Polymer BLAN-X is one of the best alternatives. We are probably the world's utmost expert in blank ammunition for training purposes, enabling users the most realistic training situations, regardless of the conditions. We offer a wide range of calibers – not only for professional military use, but also for use in warning or chasing away flocks of birds, for example at airfields.

THE STEYR ARMS COMPANY GROUP

Originating from a traditional location in Steyr, which was eponymous for the enterprise, STEYR ARMS expanded to an international entrepreneurial group with premises in Austria and the USA. High-quality outdoor products are developed and world wide marketed by STEYR ARMS. These products are primarily hunting and sporting weapons, knives, apparel and accessories. Furthermore, STEYR ARMS is planning, together with selected partners, to create new product lines in the near future.

STEYR HS .50

The STEYR HS .50 opens an era of longrange shooting. The cold hammer forged barrel ensures excellent precision up to a distance of 1,500 m.

Directly after assembly, the weapon is ready for use. Taking off the barrel complete with optics takes only a few seconds. The "Side Loading Magazine" enables to switch the magazine without changing the position.

STEYR SSG 08 A1

A highly accurate bolt action sniper rifle, with a folding stock and an adjustable cheek piece and butt plate. It is equipped with a bipod and a "butt spike" monopod for added stability. The pistol grip is customisable by changing the front and back straps. The rifle has a Picatinny rail for mounting optics. The rifle also features an improved muzzle brake over the SSG 04, with the ability to attach a suppressor.

STEYR DMR 762

The STEYR DMR 762 is a fully metal rifle weighing less than 4 kg and delivering sub-MOA precision. The folding and adjustable stock increases the rifles transportability. The stock is adjustable to six positions, in total the rifle can be elongated by up to 82mm.

No tools are needed for changing the position of the charging handle. The charging handle is incorporated in the handguard and serves as forward assist. The M-Lok slots at 3, 6 and 9 o'clock enable installation different target facilities.

DESIGNED TO STOP, NOT KILL

Byrna CL Launcher

The Byrna CL (Compact Launcher) is the most compact less-lethal launcher in the world. The entire platform has been reimagined for maximum concealability and stopping power. Powered by compressed air (CO2), the Byrna CL shoots .61 caliber round kinetic and/or chemical irritant projectiles that can disable a threat from up to 60-feet away.

- .61 Caliber Projectiles (15 per kit)
- 5-round Magazine (2 per Kit)
- Uses 8-gram CO2 (2 per Kit)
- Picatinny Rail
- Improved fiber optics sights for faster target acquisition
- Trigger pull the CO2 is punctured and a projectile is launched simultaneously.
- Red-dot-ready universal bolt pattern
- Loaded chamber indicator
- PATENTED PULL-PIERCE TECHNOLOGY: CO2 is stored in the launcher unpunctured until the first trigger pull. On first

Mission 4 Kit

Introducing the next level of home-defense badassery. Previously available only to law enforcement agencies, the re-engineered Mission 4 by Byrna is the ultimate high-capacity solution to defend your property.

- Uses 88-gram CO2
- Quad Picatinny Rail
- Foregrip for Better Control
- Two Position External Safety Switch
- Folding Front and Rear Sights for Improved Target Acquisition
- Anodized Orange Fully Aluminum Charging Handle
- Fully Pneumatic Operation - Does not use batteries or electronics
- Durable Magnesium Receiver
- AR-15 Style M-LOK Shroud
- Integrated Sling Mounts
- High Performance In-line Bolt System
- High Performance Anodized Orange Barrel with Muzzle Brake
- Gas On/Off Slide Valve - Allows the user to disconnect the CO2 source from the launcher

ARCTIC PROJECT

Designed and Engineered in Italy

PlaySport, based in Altivole, Treviso, is a historic company specialising in the design and marketing of military footwear.

For decades, PlaySport has been offering high-quality products, developed with precision and attention to detail. Since 2022, the company has been part of the MCM group, further strengthening its position in the industry.

The models designed by PlaySport are manufactured in the group's production hub, the Rekord company, located in Romania, guaranteeing an efficient and reliable production process.

ICEFIELD PRO

This snow boot, designed for special forces military equipment, is perfect for dealing with extreme weather conditions. The fabric and polyurethane upper offers durability and protection, while the 600g felt and aluminum lining provides excellent thermal insulation.

The durable construction and **Vibram®** Teton outsole ensure stability and grip on difficult terrain.

Available in a wide range of sizes, from EU 36 to 48 (UK 3.5-13), it can be customized in color and fabric finish to meet the specific needs of each operation.

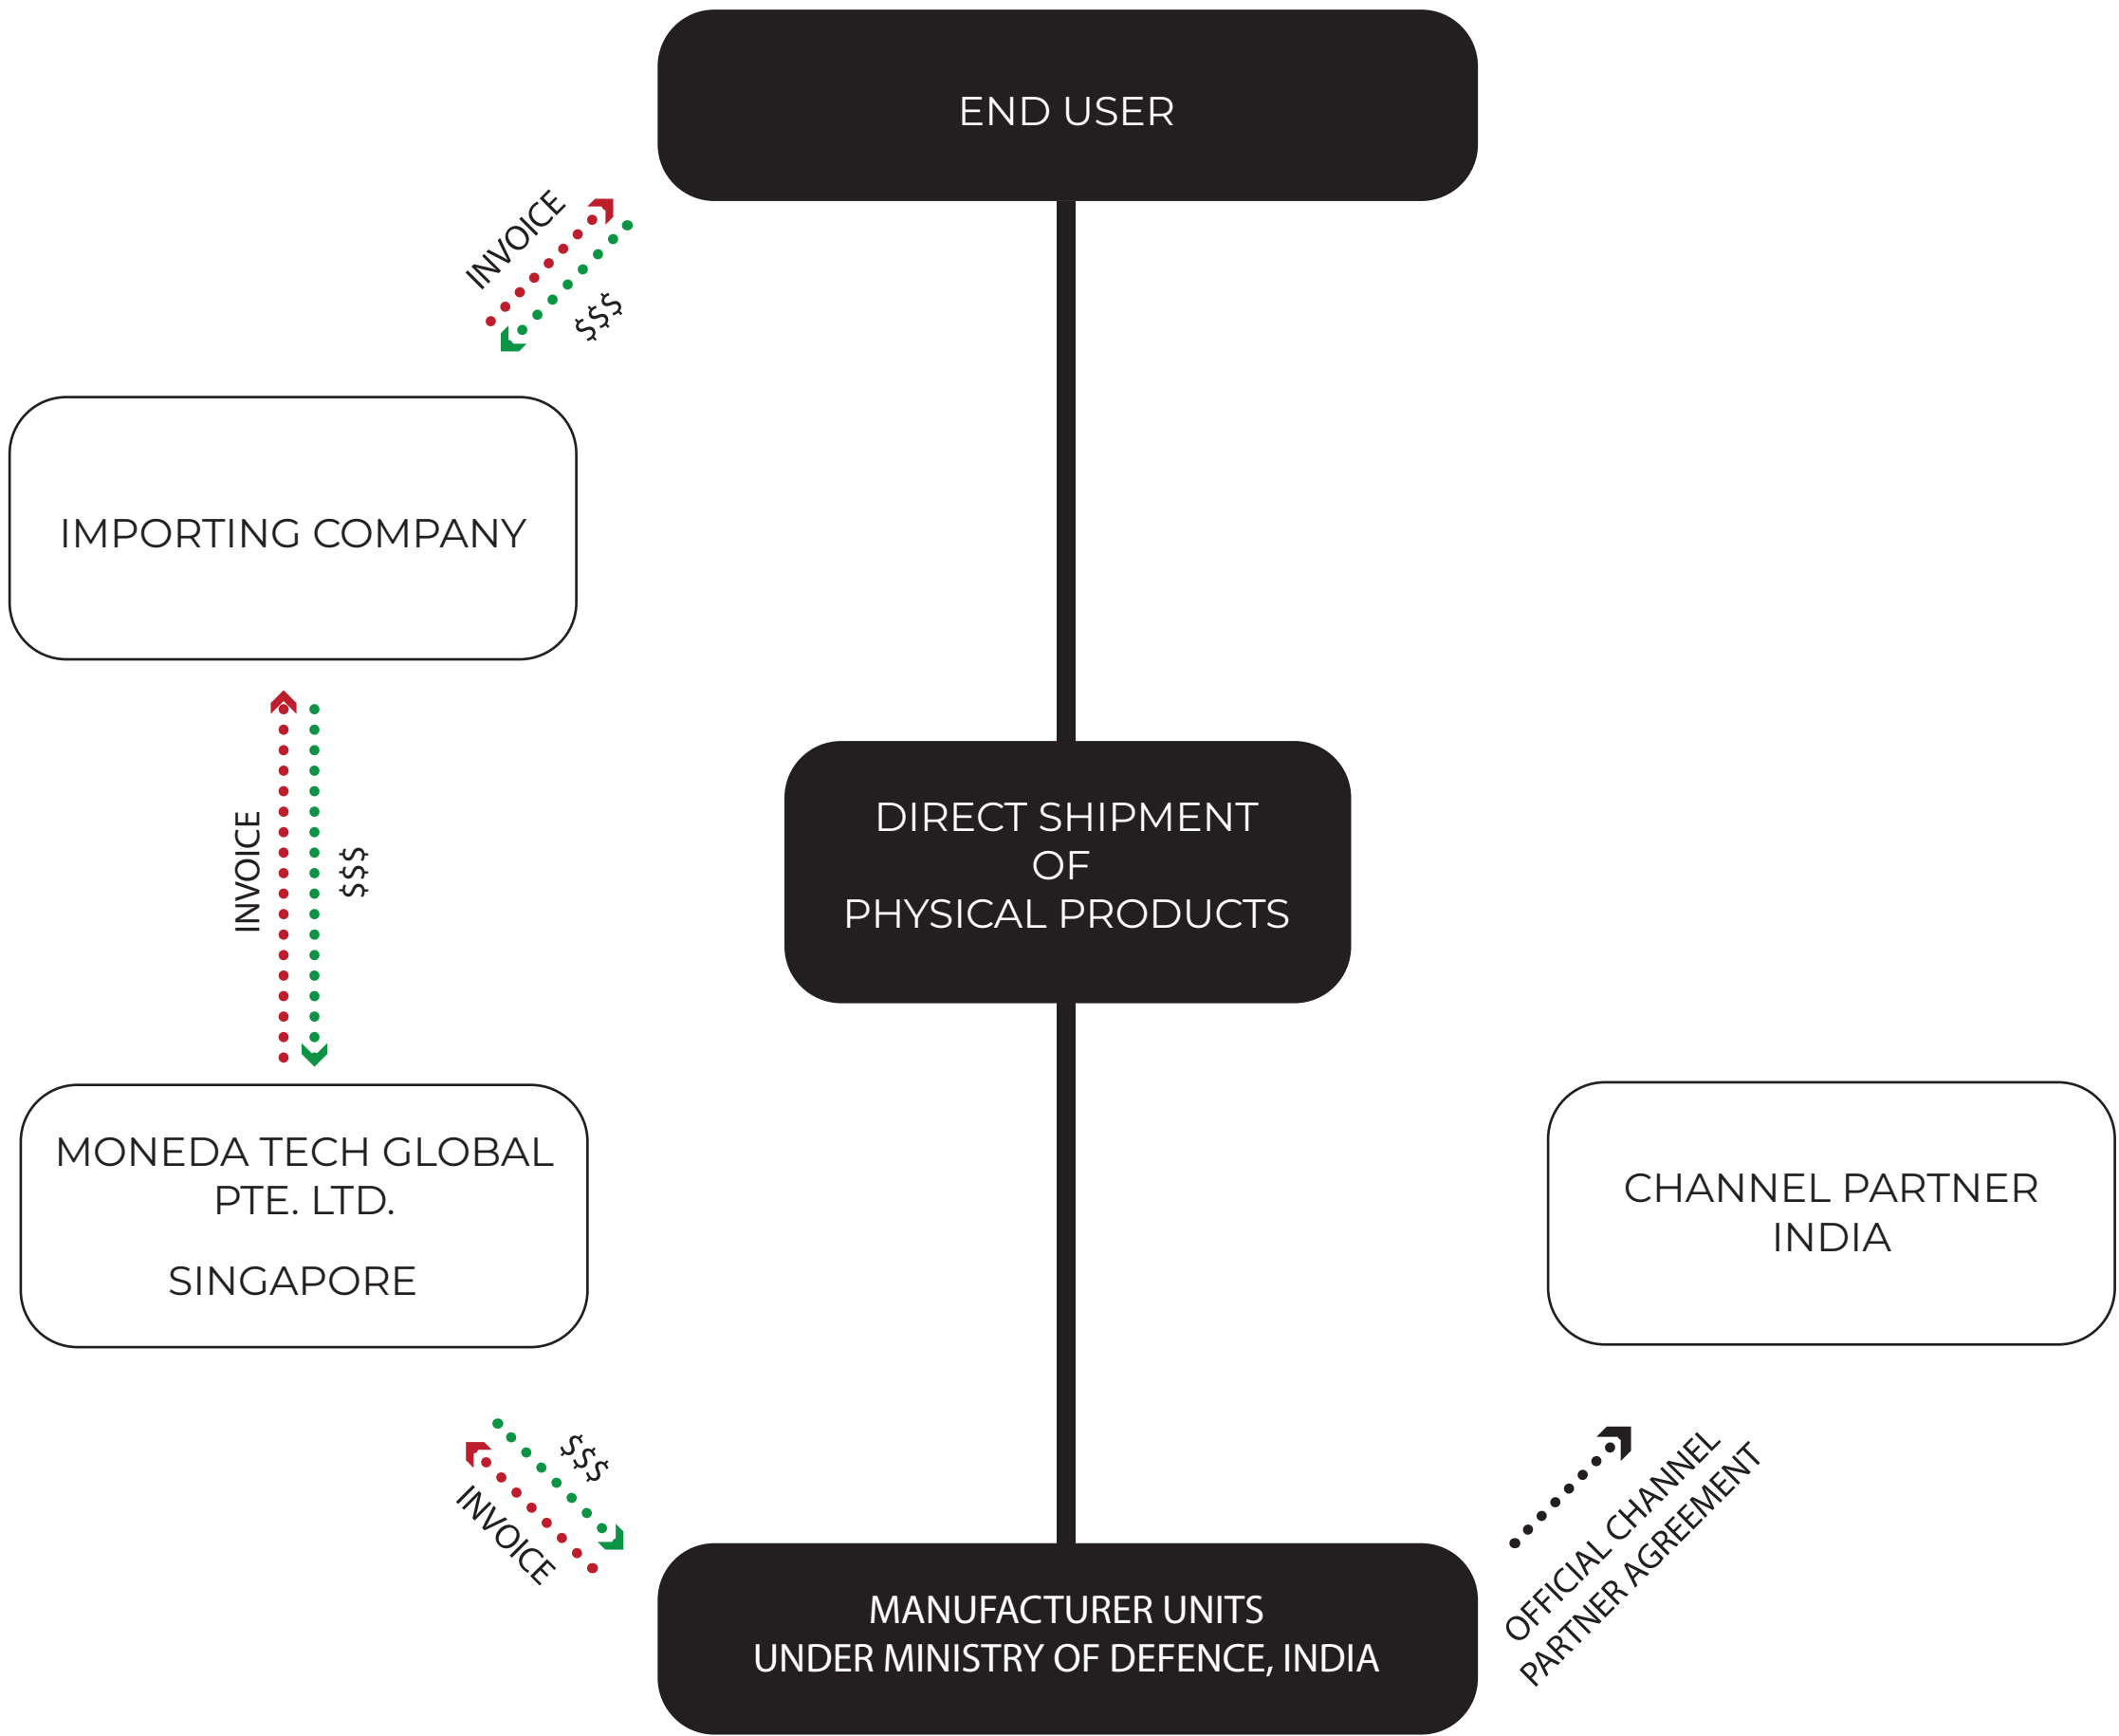

XC SPECIALIST

This snow boot, designed for special forces, is ideal for operations in extreme weather conditions. The fabric and full-grain leather upper provides high-level durability and protection. The interior features a removable bootie for thermal insulation and comfort, easily removable for quick drying.

Built with durable technology, offering strength and durability, the boot has a cross-country ski binding, making it perfect for winter missions on snow and ice.

Available in sizes EU 36-48 (UK 3.5-13), it is highly customizable.

OUR MODUS OPERANDI

Key Players in Our Transactions

- Manufacturer: All manufacturing units are under the Ministry of Defence in India.
- Authorized Export License Holder: Moneda Technologies India (or its subsidiary) holds the official export license for all manufacturing units under the Ministry of Defence.
- Transaction Execution: Moneda Tech Global Pte. Ltd. in Singapore is the authorized company that executes and trades all orders.
- Importing Company: The Official Agency of the Govt. of the End User responsible for Procuring the products on behalf of the End User.
- End User / Final Buyer: The final buyer is always a Ministry of Defence or a government entity from any country. Private companies or entities are not permitted to be the final buyer.

Transaction Flow and Compliance

- End User Certificate (EUC): Every single transaction is registered, monitored, and approved by the EUC issued by the Ministry of Defence in India. The EUC will specify all companies and products involved in the transaction.
- Shipment: Physical products are provided by the Ministry of Defence units on an FOB India Port or Ex. Works basis. The end user will receive the goods directly via sea shipment or air cargo.
- Direct Shipment Policy: Shipments of physical goods are moved directly from the Ministry of Defence to the end user. Moneda Tech Global Pte. Ltd. or any other company involved in the transaction is not permitted to handle the physical import or re-export of the products.
